It did not take Cllr Waters long to settle into the administrations mantra, if it smells do not speak to the public. 😊

If once again we return to the original explanation provided by the secretary to the association by way of explaining the restriction of entry to members of the public, and the reason provided for requesting that the police attend to remove a member of the public, the associations secretary had said on numerous occasions that East Renfrewshire Council had been heavily involved in the preparation of their constitution.

Cllr Miller also said to Newsline "I also asked the Head of Planning if he had given them any advice in drawing up the new constitution and he said no. I also asked the Community Planning Team as to whether they were asked for any advice and they said that they had been asked and had given

constitutional advice but that advice had subsequently been ignored."

Lucky the mans house was not surrounded by cops and accused of drunk driving, seems to be a habit in East Ren if you dont like what is being said, call the cops. Absolutely outrageous!

Gloria, it is called wasting police time and is a criminal offence and the person making the call could and should be charged, irrespective of whether they claim to have thought they were right to do so. Control room staff were engaged in taking the call and sending officers, a police crew was sent and whether they got there or not before being cancelled their time was devoted to that call, they could have been doing other policing things instead of attending a fictitious call. The person making the call is ultimately responsible at the end of the day.
