However an FOI that was inspired by Chairman D'Souza's comments has resulted in over 324 pages of material being disclosed.

One of the many interesting aspects of this disclosure is that it would actually appear that it was Chairman D'Souza that set the ball in motion for an internal audit in August 2012 due to his direct correspondence with the Council Chief Executive, the Head of Democratic Services and he is being somewhat economical with the truth.

In one of the disclosed emails the Head of Democratic Services is explaining that chairman D'Souza does not want to appear guilty by association.

Cllr Vincent Waters then becomes heavily involved in discussions with ERC concerning the Community Council, after he has been fed information by an undisclosed Giffnock Community Council member.
